My Objective

Forward-thinking student with a passion for front-end development, aiming to utilize creativity and problem-solving abilities to deliver engaging user experiences and drive the success of dynamic web projects.

Education

- **BTECH IN CSE (NKOCET, SOLAPUR)**   Jan 2021 – Pursuing
  CGPA-8.6 (Upto 6th Sem)
  Currently studying in 8th Sem
- **12th (SES JUNIOR COLLEGE, SOLAPUR)**   Jun 2019 – Feb 2020
  Percentage – 65%
- **10th (INDIAN MODEL SCHOOL,SOLAPUR)**   Jun 2017 – Mar 2018
  Percentage – 90%

Projects

Text Editor App – *HTML, CSS, Bootstrap, Javascript, React.JS, Node.JS*
Built using React.js and Bootstrap, this text editor app offers functionality to convert text to uppercase or lowercase, clear content, and copy text. It dynamically displays word and character count, as well as estimated reading time for paragraphs. Additionally, it features a preview tab and a theme switcher for light and dark mode.

Rest Countries API – *CSS, Javascript, React.JS, Node.JS*
React project with advanced skills in React and vanilla CSS. Uses Fetch API for dynamic country data display. Features search, region filtering, custom light/dark mode, and React Router for seamless transitions. Includes responsive design and unique shimmering effect for enhanced UX.

News App – *HTML, CSS, Bootstrap, React.JS, Node.JS*
Built responsive news app with HTML, Bootstrap, and ReactJS. Utilized React Router for seamless section switching, dynamic news fetching via Fetch API, and added a top loader for better user experience. Note: API restrictions limit access to localhost; GitHub repository link provided.

Expense Tracker (CRUD APP) – *HTML, CSS, React.JS, Vite, Node.JS*
Created an efficient expense tracking CRUD app using React and Vite. Key features include local storage integration for data protection, custom hooks for streamlined filtering and storage management, error messaging for improved user experience, and a user-friendly context menu for data manipulation. Note: Initial app loading includes dummy data for demonstration, which users can easily replace with their own information.

Skills

Languages	Libraries	Interpersonal Skills	Version Control
HTML	Tailwind	Self-learning, Flexible	Git and Github
CSS	Bootstrap		
(Responsive	React.JS		
Design), JavaScript,			
Node.JS
